

CURRICULUM VITAE

William B. Whitman

Address: Department of Microbiology
University of Georgia
Athens, Georgia 30602-2605

Phone: 706-542-4219
706-542-2674 (fax)
whitman@uga.edu (e-mail)

Education:

Bachelor of Science, 1973, from the Department of Biological Sciences, State University of New York at Stony Brook.

Doctor of Philosophy, 1978, from the Department of Microbiology, University of Texas at Austin. Advisor: F. Robert Tabita.

Postdoctoral work, Department of Microbiology, University of Illinois, 1978 - 1982. Advisor: Ralph S. Wolfe.

Academic Positions:

Emeritus Professor of Microbiology, University of Georgia, 2019-present

Distinguished Research Professor of Microbiology, University of Georgia, 2011-2019

Head, Department of Microbiology, University of Georgia, 2006-2012

Professor of Microbiology, University of Georgia, 1993-present

Associate Professor of Microbiology, University of Georgia, 1988-1993

Assistant Professor of Microbiology, University of Georgia, 1982-1988

Graduate Faculty, University of Georgia, 1984-present

Joint appointed Department of Biochemistry, University of Georgia, 1986-present

Joint appointed Department of Marine Science, University of Georgia, 1993-present

Adjunct Professor of Key Laboratory of Development and Application of Rural Renewable Energy, Chengdu China, 2018-2021

Membership in Professional Societies:

American Association for the Advancement of Science, 1975-present

American Society for Microbiology, 1975-present

Southeastern branch, American Society for Microbiology, 1982-present

American Society of Biological Chemistry, 1982-1995

American Academy of Microbiology, 1994- present

Bergey's International Society for Microbial Systematics, 2010-present

Other Professional Service:

Secretary, ICSB Subcommittee on the taxonomy of methanogenic bacteria, 1986-2001
Advisory Board, N.I.H. Stable Isotope Resource at Los Alamos, 1988-1995
Editorial Board, Journal of Bacteriology, 1989-1994
Panel Member, NSF program in Cellular Biochemistry, 1992-1994
Associate Editor, International Journal of Systematic Bacteriology, 1995-2001
Co-chair (with A. Klein) of Gordon Research Conference on Archaea: Ecology, Metabolism and Molecular Biology; Plymouth State, Colorado, 1996
Panel Member, DOE Energy Biosciences, 1998
Co-organizer (with D. Soll) of Keystone Symposium entitled Archaea: Bridging the Gap Between Bacteria and Eukarya, Taos, New Mexico, 1999
Franklin College Outreach Program, 1995-2003
Panel Member, NSF program in Systematics, 2002
Chair, Division I (General Microbiology), American Society for Microbiology 2003
Co-organizer (with D.C. Coleman and C.Y. Chiu) International symposium on impacts of soil biodiversity on biogeochemical processes in ecosystems. Taipei, Taiwan, 2004.
Panel Member, DOE program in Microbial Genomics, 2004
Advisory Committee, ATCC Bacteriology Program, 2004
Advisor, NRC meetings on Microbial Forensics, 2004
Co-organizer (with J. Leigh) ASM Symposium entitled Genes to proteins in Archaea, Boston, 2008
Panel Member, AAM Workshop, Large Scale Sequencing, Washington, DC, 2008.
Program review, Department of Microbiology, North Carolina State, May 2011
Panel Member, JGI Community Sequencing Program, August 2011
Panel Member, JGI Quarterly Call Community Sequencing Program, September 2012
Panel Member, JGI Quarterly Call Community Sequencing Program, January 2014
Panel Member, JGI Community Sequencing Program, June 2014
Panel Member, National Science Foundation, February 2015
Panel Member, JGI Community Sequencing Program, July 2015
Panel Member, JGI Community Sequencing Program, December 2015
Board, Bergey's Manual Trust, 2006-present
Supervising Editor, Bergey's Manual Trust, 2006-2019
Treasurer, Bergey's International Society for Microbial Systematics, 2010-2020
Member, Scientific Advisory Board, Biodiversity Research Center at Academica Sinica, Taiwan, 2013-present.
Editor, Archaea, 2013-present
Treasurer, International Committee for Systematics of Prokaryotes, 2014-present

Outreach:

Judge, Georgia State High School Science Fair, 1995, 1998, 2000-2010, 2012-2013
Judge, Clarke County School Science Fair, 2002, 2004-2010, 2016
Judge, Barrow Elementary School Science Fair, 2007-2008

Franklin College Outreach Program, 1995-2002 (lectures on Microbiology in elementary schools)

Microbiology demonstrations at local schools:

Chase Elementary School, 2003

Clarke County Middle School, 2003

UGA Day for Clarke County Schools, 2005

Whit Davis Elementary School, Spring and Fall, 2008, Fall 2009, 2015, 2017

Fowler Drive Elementary School, Fall 2009-2014

PAL programs at Fowler Drive and Chase Elementary School, 2016, 2017

Stroud Elementary School, Spring 2019

Honors:

National Research Service Award, NIH-PHS Postdoctoral Fellowship, February 1979

Presidential Young Investigator Award, June 1984

Achievement Award for New Scholars, 1985, Southern Conference of Graduate Schools

Fellow, 1995, American Academy of Microbiology

Bergey's Award, Bergey's Manual Trust, 2000

P.R. Edwards Award, Southeastern Branch of the American Society for Microbiology, 2000

Robert G. Eagon Award, Southeastern Branch of the American Society for Microbiology, 2004

Fellow, American Association for the Advancement of Science, 2006

USFCC/J.Roger Porter Award, American Society for Microbiology, 2010

Distinguished Research Professor, University of Georgia, 2011

Chinese Academy of Sciences Visiting Professorship for Senior International Scientists, Institute of Microbiology, Laboratory of Xiuzhu Dong, 2013

Dissertations Directed: Ph.D., University of Georgia

Jer Song Shieh (1988) Carbon metabolism in methanococci.

Jonathan Ladapo (1990) Investigation of wild type and acetate auxotrophic mutants of *Methanococcus maripaludis*.

RuYe Xing (1992) Branched-chain amino acid biosynthetic pathway of archaebacterium *Methanococcus* spp.

Peter Godfrey Simpson (1993) Investigation of amino acid metabolism in *Methanococcus voltae*.

Timothy Bowen (1993) The development of a genetics system for *Methanococcus*.

Yu-Ling Yang (1994) Investigation of pyruvate oxidation regulation of *Methanococcus*.

Jyoti Keswani (1994) Use of molecular approaches for identification and classification of the methane producing archaea, *Methanococcus*.

Debra Lynn Tumbula (1997) Development of genetic methods for *Methanococcus maripaludis*.

Jae-Pil Yu (1997) Investigation of autotrophy in *Methanococcus maripaludis*.

Warren Gardner (2000) Expression vectors for the methane-producing archaeon *Methanococcus maripaludis*.

Michelle Furlong (2000) Bacterial communities in natural ecosystems: groundwater, soil, and earthworm casts and burrows.

- David Singleton (2002) Prokaryotic communities associated with the earthworm *Lumbricus rubellus* and the agricultural soil it inhabits.
- Winston Lin (2002) Investigation of the anabolic pyruvate oxidoreductase and the function of PorEF in *Methanococcus maripaludis*.
- Kamyar Farahi (2002) Investigation of the evolution of the aminoacyl-tRNA synthetases by the ratios of evolutionary distance method.
- Wonduck Kim (2003) Genetic studies of carbon dioxide fixation in the methane-producing archaeon *Methanococcus maripaludis*.
- Tiffany Major (2006) The role of the energy conserving hydrogenase B in autotrophy and the characterization of sulfur metabolism in *Methanococcus maripaludis*
- James Henriksen (2008) Physiology of DMSP metabolism in a model marine roseobacter, *Silicibacter pomeroyi*.
- Yuchen Liu (2010) Adaptations of *Methanococcus maripaludis* to its unique lifestyle.
- Chris Reisch (2011) Metabolism of DMSP by *Ruegeria pomeroyi*.
- Felipe Andres Sarmiento Boban (2013) Genome-wide survey of gene functionality for the methanogenic archaeon *Methanococcus maripaludis*
- Hannah Bullock (2016) Methylmercaptopropionate-CoA ligase and methythioacryloyl-CoA hydratase from the dimethylsulfoniopropionate demethylation pathway
- Feng Long (2017) Aspects of sulfur metabolism in methane-producing archaeon *Methanococcus maripaludis*
- Joseph Wirth (2019) Phylogenomics and the metabolism of sulfur compounds in the roseobacter group

Current Doctoral Students:

Taiwo Akinyemi

Nana Shao

Tao Wang

Thesis Directed: M.S. University of Georgia

- See Hyang Sohn (1985) The regulation of the incorporation of isoleucine, leucine and acetate in *Methanococcus voltae*.
- RuYe Xing (1988) Sulfometuron methyl sensitive and resistant acetolactate synthase of the archaeabacterium *Methanococcus*.
- Yu-Ling Yang (1989) Pyruvate oxidation in *Methanococcus* species.
- Brian Waters (2002) Investigation of 2-oxoacid oxidoreductases in *Methanococcus maripaludis* and large scale growth of *M. maripaludis*.
- Rima Upchurch (2006) Analyses and comparison of bacterial communities with different land managements.
- Shiyao Wang (2009) The diverse microbial community in Sapelo Island and study on the pathway of DMSP degradation in marine bacteria.
- Warren Crabb (2013) Metabolism of organosulfur compounds in *Ruegeria pomeroyi* DSS-3

Postdoctoral Research Associates:

Usha Premachandran (1985-1986) Indian Agricultural Institute, New Delhi
Neil Schauer (1985-1986) Virginia Polytechnical Institute
Mostafa Mesbah (1986-1988) University of Bradsford, England
Sang Ho Park (1992-1994) Montana State University
Iain Anderson (1998-2000) University of Wisconsin, Madison
Iris Porat (2002-2009) Ben-Gurion University, Israel
Boguslaw Lupa (2005-2010) Jagiellonian University, Krakow, Poland
Kamlesh Jangid (2006-2011) University of Pune
Laura Beer (2011-2012) University of Arizona
Yixuan Zhu (2012-2013) University of Georgia
Xun Li (2012-2013) Nanjing Forestry University, China
Zhe Lv (2012- 2018) China Agricultural University
Qiuyuan Huang (2014-2017) Miami University (Ohio)
Hao Shi (2014-2016) Nanjing Forestry University, China

Visiting Colleagues:

Mostafa Mesbah (1989-1990) University of Assiut, Egypt
Vigdis Torsvik (1990-1991) University of Bergen, Norway
Terje Torsvik (1990-1991) University of Bergen, Norway
Karin Everett (2002)
Chih-Yu Chiu (2002) Academica Sinica, Taiwan
Suresh Korpole (2007-2008) Institute of Microbial Technology, Chandigarh, India
Siti Chaerun (2008-2009) Institute Technologi Bandung, Indonesia
Soon Dong Lee (2009-2010) Cheju National University, Jeju, Republic of Korea.
Murali Gopal (2010) Central Plantation Crops Research Institute, Kasaragod , India
Alka Gupta (2010) Central Plantation Crops Research Institute, Kasaragod , India
Sanjib Manna (2011) Central Inland Fisheries Research Institute (ICAR), Barrackpore, India
Mingguo Jiang (2011-2012) Guangxi University for Nationalities, China
Masood Siddiqui (2012) University of Balochistan, Quetta, Pakistan
Xun Li (2013) Nanjing Forestry University, China
Wang Liang Liang (2013) Nanjing Forestry University (doctoral student)
JinHua Wang (2014) Southwest Forestry University, Kumming
Yuehong Wu (2018) Second Institute of Oceanography, SOA, Hangzhou, China

Grants or Contracts:

National Science Foundation; Metabolic Biology Program; PCM-8214068; \$120,000; 2/1/83-2/1/87.
University of Georgia Research Grant Program; \$8,105, 3/1/83-2/28/84.
National Science Foundation Presidential Young Investigator Award; Metabolic Biology Program; PCM-8351355; \$500,000 (with industrial matching funds); 7/1/84-6/31/89.

University of Georgia Program in Biological Resources and Biotechnology (with Dr. Joseph Frank, Department of Food Sciences); \$47,000; 1/1/85-4/15/87.

National Science Foundation; Biosynthesis of branched-chain amino acids by methanogenic bacteria. DCB-8904511; \$120,000; 9/1/89-2/29/92.

Environmental Protection Agency; RITG Workshop; CR-816378-01-0; \$20,000; 9/11/89-9/10/90.

Environmental Protection Agency; Greenhouse Gases from the Taiga; AERL 9003; \$149,792; 9/24/90-4/15/94; W. J. Payne, Co-PI.

National Science Foundation; Biosynthesis of branched-chain amino acids by methanogenic bacteria; DCB-9103349; \$210,000; 8/91-8/94.

Department of Energy; Biochemistry and genetics of autotrophy in *Methanococcus*; DEFG09-91ER20045; \$216,000; 8/91-8/94.

Eisenhower Higher Education Grant: Teaching science in the middle grades with physical and conceptual models: course and video development; E3-SA1; \$5,872; 3/92-9/93. co-P.I. with Shawn Glynn, Department of Education Psychology.

Eisenhower Higher Education Grant; Teaching science in the middle grades with physical and conceptual models; E3-SB5; \$12,602; 8/92-9/94. co-P.I. with Shawn Glynn, Department of Education Psychology.

National Science Foundation; Research and training group in prokaryotic diversity, P.I. with 22 co-PI's; BIR-9413235; \$2,030,780; 10/1/94-9/30/01.

Department of Energy; Biochemistry and genetics of autotrophy in *Methanococcus*; DEFG09-94ER20158; \$248,000, 8/94-8/97.

Naval Medical Research Institute (Geo-Centers, Inc.); Growth of *Methanobrevibacter smithii*; \$10,464; 11/96-2/98.

Department of Energy; Biochemistry and genetics of autotrophy in *Methanococcus*; DEFG09-91ER20269; \$264,000, 8/97-8/00.

Naval Medical Research Institute (H.M. Jackson Foundation); Growth of *Methanobrevibacter smithii*; \$36,000; 4/98-9/99.

Department of Energy; Biochemistry and genetics of autotrophy in *Methanococcus*; DEFG09-91ER20269; Renewed for \$308,000, 8/00-8/03.

National Science Foundation; Microbial Observatories: prokaryotic diversity of a salt marsh/estuarine complex at the University of Georgia Marine Institute, Sapelo Island (M.A. Moran, P.I. with 3 coP.I.s); \$1,002,182; 11/00-10/05.

University of Nebraska (subcontract from N.I.H.); Enzymology of the reductive acetyl-CoA pathway; \$72,484; 4/00-3/02.

Department of Energy; Global regulation in the methane-producing archaeon *Methanococcus maripaludis*; DEFG02 01ER15262 (J. Leigh, P.I. with 5 Co-P.I.s) Univ. of Georgia portion \$591,325, 9/01-9/04.

Department of Energy; Biochemistry and genetics of autotrophy in *Methanococcus*; DEFG09-91ER20269; Renewed for \$380,000, 8/03-8/07.

National Institutes of Health; Proteomic analysis using FTICR/MS; (J. Amster, P.I., R.S. Phillips and W.B. Whitman, co-P.I.s); Whitman portion, \$25,000 per year (dir. cost); 12/03-11/06.

National Science Foundation; Bacterial regulation of organic sulfur cycling in the ocean: a genomic approach; (M. Moran, PI, with 3 co-P.I.s); \$481,109; 6/04-5/08

Department of Energy; Hydrogenases of *Methanococcus maripaludis*; (J. Leigh, P.I with M. Hackett and W.B. Whitman, Co-P.I.s.) Univ. of Georgia portion \$433,464, 9/05-9/08.

United States Department of Agriculture; Impact of agricultural land management practices on the composition of the soil prokaryotic community; (Whitman, PI, with M.A. Williams and D.C. Coleman, co-P.I.s); \$350,000; 9/05-8/08.

GRA Energy Research Seed Grant; Removal of inhibitory acetate and furfural from dilute acid hydrolysates of lignocellulose by anaerobic microorganisms; \$40,080; 11/06-6/07. Renewed for \$60,440; 11/07-6/08.

National Institutes of Health; *Methanococcus maripaludis* as an emerging model organism; 1 R24 GM074783-01A1 (J.A. Leigh, P.I., M. Hackett and W.B. Whitman, Co-P.I.s); Whitman portion, \$244,360 (total costs, 2/07-1/11).

National Science Foundation; Microbial Observatories: functional genomic investigations of dissolved organic carbon cycling at the Sapelo Island Microbial Observatory MCB-0702125 (M.A. Moran, P.I. with M.G. Booth and W.B. Whitman, coP.I.s); \$1,250,137; 09/15/07-09/14/12.

National Science Foundation; En-Gen: a functional genomics approach to organic sulfur cycling in the ocean. OCE-0724017 (M.A. Moran, P.I., with R.P. Kiene and W.B. Whitman, coP.I.s); \$864,783; 10/01/07-09/30/10.

National Science Foundation; Characterizing microorganisms during ecosystem development: do soil microbial communities show patterns of succession? DEB-0743516 (M.A. Williams, P.I., with Kamlesh Jangid and W.B. Whitman); \$111,820 (UGA portion); 08/01/08-07/31/11.

Department of Energy; Hydrogenases of *Methanococcus maripaludis*; DE-FG02-05ER15709 A002 (J. Leigh, P.I with M. Hackett and W.B. Whitman, Co-P.I.s.) Univ. of Georgia portion \$486,714, 09/01/08-08/31/2011.

Department of Energy; Hydrogen regulation and global responses to electron, carbon, and nitrogen sources in *Methanococcus maripaludis*; DE-FG02-08ER64685 (J. Leigh, P.I with N. Baliga, M. Hackett and W.B. Whitman, Co-P.I.s.) Univ. of Georgia portion \$205,159; 09/15/08-09/14/2011.

National Science Foundation; Dimethylsulfoniopropionate metabolism by marine bacteria. MCB-1158037 (W.B. Whitman, P.I., with M.A. Moran); \$672,413; 09/01/12-08/31/16.

Korean Ocean Research Development Institute; Synthetic biology of methanogens for biogas production; 65,000,000 KRW (~ \$ 120,000); 05/01/2012-12/31/2013.

Joint Genomes Institute- Department of Energy, Community sequencing proposal: Genomic encyclopedia of bacterial and archaeal type strains, phase III: the genomes of soil and plant-associated and newly described type strains. (W.B. Whitman, P.I. with T. Woyke, N. Krypides, H.P. Klenk, T.G. Lilburn, B.J. Beck, P. De Vos, P. Vandamme, J.A. Eisen, G. Garrity, and P. Hugenholtz) Approval to sequence the genomes of 1000 prokaryotes. 10/01/2013-09/30/2015.

National Science Foundation; Dimensions: Collaborative Research: Bacteria taxa that control sulfur flux from the ocean to the atmosphere. OCE-1342694 (M.A. Moran, P.I., with W.B Whitman, R.P. Kiene, J. Birch, and C.A. Scholin); \$1,356,779 (\$562,867 to WBW); 01/01/2014-12/31/2019.

National Science Foundation; High resolution linkages between DOC and bacterioplankton.

OCE-1356010 (M.A. Moran, P.I., with W.B Whitman, P. Medeiros, F. Ballantyne, and I.J. Amster); \$998,701 (\$250,000 to WBW); 01/02/2014-12/31/2017.

National Science Foundation; Collaborative Research: Unraveling sulfur networks in methanogenic archaea. MCB-1410102 (PI with Yuchen Liu [Yale Univ.]; \$348,457 to UGA; 07/01/2014-06/30/2017.

AgResearch, Palmerston North, New Zealand. Subcontract on Fast tracking of methanogen specific inhibitors. {Ron Rominus, PI) 82,000 [NZ dollars; ~\$70,000] 06/05/2013-06/15/2016.

University of Illinois and NIH, Subcontract on Structure and function of the elongator complex (Raven Huang, PI). \$64,250 (total costs); 9/30/2014-7/31/2016.

DOE-STTR program, Carbon and energy capture from biogas for the production of biochemical (with Goutham Vemuri, PI); \$75,000 to UGA; 03/11/2016-10/22/2016.

Department of Energy; Expression of recombinant methyl-coenzyme M reductase in the methanogenic archaeon *Methanococcus maripaludis* for the examination of activation and the role of post-translational modifications; DOE-BES 056756-01 (PI with Eduardus Duin, Auburn Univ.); \$298,654 to UGA; 09/01/2017-08/31/2020.

Joint Genomes Institute- Department of Energy, Community sequencing proposal: Genomic encyclopedia of bacterial and archaea VI: functional genomics of type strains. (W.B. Whitman, P.I. with H.P. Klenk, D.R. Arahal, R. Aznar, G. Garrity, M. Göker, P. Hugenholtz, and M. Pester. Approval to sequence the genomes of 10,000 prokaryotes along with 1000 transcriptomes and 600 exometabolite surveys. 10/01/2018-09/30/2023.

ExxonMobil Research and Engineering Company; Methane production and oxidation by recombinant methyl-coenzyme M reductase; (CoPI with Eduardus Dunn and Steven Mansoorabadi, Auburn Univ.); \$65,000 to UGA; 09/15/2019-09/14/2020.

Department of Energy; Activation of recombinant methyl-coenzyme M reductase in the methanogenic archaeon *Methanococcus maripaludis* and the role of post-translational modifications; (PI with Eduardus Duin, Auburn Univ.); \$239,166 to UGA; 10/01/2020-09/30/2023 [pending].

Research Interests:

Prokaryotes are the dominant form of life on earth, representing an enormous biomass and number of individual cells. They are so diverse that it is misleading to give them a common name, and they are really just what are left after the familiar plants, animals, fungi and protists are named. They are the engines that make the biosphere and the ancestors to all modern life. Their evolution established the central plan for the living cell. Research in our laboratory uses an integrated approach to understand the nature of free-living prokaryotes. We believe that studying the ecology, systematics, physiology, biochemistry, and molecular biology together provide the best understanding for these microorganisms. Likewise, the history or evolution of an organism provides insight into the modern organism. We have used these approaches to study the carbon metabolism of the methane-producing archaeon *Methanococcus*, the sulfur metabolism of the marine alphaproteobacterium *Ruegeria*, and the impact of agriculture on soil bacterial communities.
